## OUR NEW WEBSITE!

We herewith announce the launch of our newly designed website! As a leader in refractory, insulation and passive fire protection techniques, it is important for us to make information about products, services and solutions easily accessible for our current and prospective clients.

Visit us at [www.thermoheat.nl](http://www.thermoheat.nl)

## PRODUCT HIGHLIGHT!

### Monolithics up to 1850°C

Thermoheat offers a variety of choices when it comes to castable products, including gunite, pumpable and shotcretable products. These products have proven themselves over many years and a wide variety of service applications. They are designed to provide consistent performance where excellent physical properties and cost effective products are required. Please contact us for our wide range of monolithic refractories to suit your application.

## PERSONNEL IS API CERTIFIED!

Four employees are now certified according to API-936 Refractory Personnel. The American Petroleum Institute and specifically API-936 is working with ASTM-standards for refractory products. The API-936 is for inspection, installation, testing and repair for monolithic linings.
