MAINTENANCE NEXT 2017

We are pleased to announce that we will be exhibiting at Maintenance Next 2017, April 11-13, Rotterdam Ahoy, hall 5, booth 5.100. Our team looks forward to meeting you and to explaining more about our products and services.

"Maintenance Next is an interesting fair where we can show ourselves to the industry in our region and beyond."

PRODUCT HIGHLIGHT!

Precast Shapes

We have a wide range of refractory casting materials up to 1870°C. The use of precast shapes has many advantages. The ready made product can be inspected on quality and dimensions. Thermoheat's workshop at Middelharnis is well equipped for precasting of shapes up to 10 tonnes of casted weight. The shapes can be dried out before shipment and are therefore ready to use without the need of delicate initial dryout at startup of the unit.

WHAT IS THE VISION OF THERMOHEAT?

"Our main focus is on safety, quality and continuity. With our knowledge we evaluate the entire production process, so we can optimize the material selection to ensure the best quality. Years ago we made input to our continuity factor with Thermoheat Portugal. We work with our own trained people to work within the vision of Thermoheat!"

BEST WISHES!

All of us at Thermoheat join in saying "thank you" and wishing you a Merry Christmas and a happy New Year!
