GET IN TOUCH!

Thermoheat B.V. is known for high end quality products and 24/7 service. Do you have a question? Please do not hesitate to contact us!

Thermal Ceramics products available in Middelharnis!

We are moving forward in extending our stock levels of the Morgan Thermal Ceramics products, like Superwool Plus, Superwool HT and Superwool Extra.

Also the stocks of the fire protection range with Firemaster Marine Plus blankets is levelled up and ready to support your needs.

Other refractory products like the JM insulating firebricks including mortar, coatings and so on are available from our stock in Middelharnis.

For any requirement or technical support you may need on any Thermal Ceramics' products, please do not hesitate to contact us at +31 187 497055 or [sales@thermoheat.nl](mailto:sales@thermoheat.nl)

Thermoheat expands the sales team

The Thermoheat sales team is counting 6 motivated members to serve your questions and enquiries. We would like to introduce Ivo Baemans who is working as our sales representative.

I am Ivo, 27 years old and joined Thermoheat august this year. I have a 4 years sales experience in different segments and I am excited to join Thermoheat in this technical and challenging markets. During my search for a new career, I was looking for a company with the same values as mine. "No is not an answer and nothing is impossible".

In my spare time I like to do sports like running, mountain biking and playing golf. I am also a volunteer at the local hockey club.

I hope to be your point of contact if you have any new enquiries and I am looking forward to see you soon.

Loading out of furnace dish head

In our shop in Middelharnis, furnace parts are being lined with refractory materials.

Dry-out before shipment is an activity, which we perform often as well.

Shipping pre-lined parts to the job site has a major positive impact on the onsite shutdown planning.

Our shop is well equipped and by using our shop this contributes to a clean, safe a controlled installation.

Our record in weight of a pre-lined furnace is 410 tons!
